

Eduardo Crespo

Product Designer | UX · Design Systems · Healthcare Technology

New York, NY • crespoeduardo@icloud.com • 786-973-6289 • eduardo-crespo.com

Product Designer with 5+ years of experience making complex workflows feel simple. Background in visual art and healthcare technology, with hands-on skills spanning research, interaction design, design systems, and front-end development. Known for bridging clinical stakeholders, engineering teams, and end users to ship products that work.

EXPERIENCE

Memorial Sloan Kettering Cancer Center — Product Designer

Apr 2021 – Oct 2025

New York, NY

PlanQ — radiation therapy planning dashboard

- Led interface design for a new therapist-facing dashboard — translating complex clinical workflows into a multi-role UI that supported an incoming user type while improving workflows.
- Owned the notification system end-to-end: defined alerting logic and rules with clinical stakeholders, then designed interaction patterns and UI across all user roles.

Patient Self-Scheduling — web app

- Led end-to-end design of a self-scheduling web app — conducting independent user research, defining the interaction model, and iterating through usability testing.
- Replaced a third-party scheduling vendor, delivering significant cost savings to the institution while giving patients a faster, more intuitive booking experience.

MSK Design System — forked from IBM Carbon

- Built the MSK Design System from the ground up as primary Figma designer — defining component standards, interaction patterns, and visual language forked from IBM Carbon.
- Drove accessibility implementation across components, ensuring WCAG compliance was built in rather than retrofitted.
- Scaled adoption across 12+ products and dozens of engineering teams org-wide, partnering with a design engineer on the component codebase and a design lead on cross-team alignment.

MSK Mobile Team — Remote Monitoring · The Lounge · MSK Mobile

- Sole designer on Remote Monitoring — led the full UX translation of a retiring portal into a standalone mobile app, preserving clinical utility while modernizing the experience.
- Collaborated with another designer to redesign The Lounge's registration flow, reducing friction for patients accessing the AYA program.
- Contributed feature-level UX to MSK Mobile, an existing patient-facing app, as part of the broader mobile product team.

Health Tech Startup (Stealth) — Product Designer

Oct 2020 – Feb 2021

Remote

- Conducted physician and patient research to map data workflows, informing the design of a clinical portal that centralized health information for care teams.
- Designed responsive dashboards, user flows, and UI layouts, contributing to the product's early design system and front-end component library.

Independent — Freelance & Volunteer Designer

2019 – Present

Remote

- Designed websites and digital experiences for mission-driven organizations including Con-Solatio, Mass Times Trust, Argo Arts, and Angelico Press—handling UX, visual design, and front-end implementation.
- Designed for Oppority (e-commerce) and Integrate (ed-tech) through the Beginex UX program, contributing user flows, UI design, and usability recommendations for early-stage products.

SKILLS

Design & Research: UX Design, UI Design, Interaction Design, Prototyping, Wireframing, User Research, Usability Testing, Information Architecture, Design Strategy, Accessibility, Design Systems

Technical: HTML, CSS/Sass, JavaScript, React, AI-Assisted Development (Claude Code, Codex)

Tools: Figma, Dovetail, Adobe Illustrator, Photoshop, Premiere, UserZoom

Languages: English (fluent), Spanish (fluent)

EDUCATION & CERTIFICATIONS

BFA, Interactive Arts — Pratt Institute	2015
UX Certificate — Nielsen Norman Group	2024
UX Program — Beginex	2020
